Programming of CampusLive

System Specification & Functional Structure

1. Authentication & Account Setup

1.1 SuperAdmin — Signup / Login

- Full Name
- Email ID
- Contact Number
- Password
- Institute Name
- Institute Type (School / College)
- On successful account creation, the SuperAdmin creates a unique College ID.

Post-login: Redirect the SuperAdmin to a dashboard with a welcome message.

1.2 Teacher — Signup / Login

- Full Name
- Email ID
- Password
- College ID

Post-login: Redirect the Teacher to a dashboard with a welcome message.

1.3 Student — Login

- Email ID
- Password

Post-login: Redirect the Student to a dashboard with a welcome message.

2. Database Structure

Entity	Fields
SuperAdmin	Full Name Email ID Contact Number Password Institute Name / Type
Teachers	Full Name Email ID Password College ID
Students	Email ID Password

3. Application Structure

- 3 Interfaces: SuperAdmin, Teacher, Student
- 3 Database entities: SuperAdmin, Teachers, Students

- 2 Signup Pages: SuperAdmin, Teachers
- 3 Login Pages: SuperAdmin, Teachers, Students
- 3 Dashboard Pages: SuperAdmin, Teachers, Students

Implementation Note The programming structure above reflects the raw requirements provided and is organized into authentication, database, and interface layers without changing the intended functionality.
