Structure of CampusLive

System Specification & Functional Structure

1. Platform Overview

Platform Model: Teachers-Centric Platform

Primary Interfaces: SuperAdmin, Admin / Teachers, Students

2. Account & Access Structure

2.1 Common Authentication

- Separate Login / Registration forms based on the user role
- Personal details management
- Password reset functionality

3. SuperAdmin Dashboard

- While creating the SuperAdmin account, a college is created and associated with the account.
- A SuperAdmin cannot create multiple colleges.
- View both teachers and students associated with the college.
- Create teacher accounts and define the teacher hierarchy.
- Assign college rooms.
- Provide a communication channel for live chat or sending queries between the SuperAdmin and teachers.

4. Admin / Teacher Dashboard

- Control and manage student accounts.
- Create student accounts and maintain student details.
- Upload the complete timetable to the website.
- Select a lecture from the timetable and use the option to mark / make that lecture live.
- Create and manage live lectures.

5. Student Dashboard

- Students can log in but cannot register themselves.
- Submit queries to specific teachers through a query form.

6. Syllabus & Academic Content

- Students can view the syllabus and topics organized by modules.
- Teachers can create and manage modules and syllabus content.

7. Functional Summary

Role	Primary Responsibilities
SuperAdmin	College creation, teacher/student visibility, teacher hierarchy, room assignment, communication
Admin / Teachers	Student management, timetable management, live

	lectures, academic content
Students	Login, teacher queries, syllabus and module viewing

Note This document reorganizes the supplied raw structure into a clearer functional specification while retaining the original roles, features, and intended flow.
